

The bar chart above represents the languages that are spoken at the BRG - apart from German and English - separated into the proportions of the number of students speaking the corresponding language at “Oberstufe” and “Unterstufe”. According to this survey, we can see that there is a surprisingly high number of students at “Unterstufe” who speak foreign languages that are not taught at the BRG. As a result, we owe the increasing multiculturalism at our school to our younger students at “Unterstufe”!
